*Regional estimates were used due to small number of responses in the county.

What can be done?

Get Tested.

Knowing one's risk status and taking early action can have long-term benefits.

Who should get tested?

- Older adults, 45 +
- Overweight or obese adults
- Adults who are physically inactive
- Adults with high blood pressure
- Adults with family members who have diabetes
- Women who have had diabetes while pregnant
- Women who had a baby weighing more than 9 lbs

I have prediabetes, now what?

Lifestyle changes can help prevent or delay type 2 diabetes.

-  Improve food choices
-  Lose 5-7 percent body weight
-  Get 150 minutes physical activity per week

Low to no-cost programs in SC can help.

The National Diabetes Prevention Program is a proven program that provides group support and in person access to trained professionals.
