PROJECT SUMMARY

This planning project will support the creation of the “Appalachian Sustainable Finance Hub,” a web-based portal that will align projects in north and central Appalachia to a network of investors, pre-development funds, and other capitalization opportunities. The hub also aims to match technical assistance for communities and businesses to develop clean economy projects.

Steel Valley Authority and partners bring \$290,000 in matching funds to this project. This project will produce a plan to implement the proposed hub.
